

West Midlands Digital D&T Support Centre

Teachers Meeting

The purpose of the teachers meetings is to provide mutual support for electronics teachers and a forum to exchange ideas. Where possible, there will be a focus for each meeting. If you have ideas and suggestions for future meetings please contact us at:

hjohnson@dandteducation.co.uk

Night light

Night lights have become common place in the school curriculum. They are usually inexpensive and can make an excellent vehicle for teaching the basics of electronics. The focus of the meeting will be to construct a novel circuit for an automatic night light forming the basis for some really exciting and innovative KS3 project work.

At the meeting, we will assemble a night light, study how it works and identify opportunities for electronics teaching (appropriate for KS3).

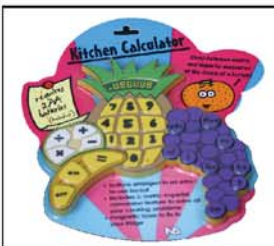

A set of 10 night light kits will be available at the end of the meeting for each school attending. If possible, please email me with your intention to attend so I can organise the purchase of night light kits.

Organisers: Hugh Johnson / Ian Craddock

Target audience: Teachers of Design and Technology/Electronics

Venue: Montagu School, Wekly Glebe Road Kettering, Northants.
NN16 9NS

Date: 4:00 – 6:00pm on Tuesday 11th November 2008
